

Emergency Vehicle Prismatic Sheeting

Emergency Vehicle Series

Two state-of-the-art film ranges for emergency vehicle marking

Setting new benchmarks

Round-the-clock visibility, rugged durability, and a professional finish are the key requirements for emergency vehicle fleet markings. Avery Reflective Products Division, working to guidelines developed by the Police Scientific Development Branch, is now able to offer the optimal self-adhesive product package for the needs of this market.

High-performance, high conspicuity

The Avery Emergency Vehicle Optimal Colour Film range meets the guidelines of the PSDB and features a choice of reflective and fluorescent qualities.

The products are multi-layered and – uniquely – non-orientation-sensitive: no matter how they are cut or applied, there is no significant loss of reflectivity values. This flexibility in conversion and application benefits fleet managers in terms of both economy and ease of handling. With a long in-service life, professionally edge-sealed and applied, this new range achieves the best possible quality-to-price ratio available today.

Specially designed for contoured vehicle panels

Avery Emergency Vehicle Contour Film – available in a range of colours – is the ideal, easy-to-use metallized reflective film for application to the contoured surfaces of emergency service vehicles.

Its flexibility and conformability are the key factors: its thin, low-caliper profile means it fits perfectly, even round demanding angles and contours. Like its sister range, it is non-orientation-sensitive – retaining its reflectivity values regardless of how it is cut or applied. Edge sealing is not required.

Emergency Vehicle Prismatic Sheeting

Durability

Both these professional-grade ranges of self-adhesive materials have been extensively field-tested on different types of vehicle, in different climatic conditions, and even in repeated high-pressure jet washes. Their conspicuity and durability are not in doubt.

Unique Dual Warranty System

But to make absolutely certain that emergency vehicle fleet managers achieve the best possible performance from their markings, Avery Reflective

Products Division's unique Dual Warranty System guarantees not only the quality of the material, but also the quality of the conversion and application. Only selected converters who have proved their ability to work with these specialized products are warranted to cut and apply the films – giving added peace of mind for the fleet manager.

For further information, please contact your Customer Service Representative.

Emergency Vehicle Optimal Colour Film

With this product, you have the benefit of a high performance film for both day and night-time conditions.

Key product features:

- Excellent day and night-time conspicuity
- Approved marking film
- Non-orientation sensitive
- Range including fluorescent

Emergency Vehicle Contour Film

This film is thinner than other products, allowing easy application on contours and all-round easy handling.

Key product features:

- Easy application on contours
- Approved marking film
- Non-orientation sensitive
- Does not require edge seal

Avery Dennison is ISO 9001 certified for the design and manufacture of retroreflective films
