

## V-9700 SERIES

*Microprismatic acrylic film provides a bright daytime color and superior nighttime reflectivity.*

## SCHOOL BUS CONSPICUITY TAPE

*This prismatic reflective film provides motorists with greater vehicle visibility and a conspicuous warning in all types of weather. A bright, new, metallized reflective film from Avery Dennison, V-9700 Series will increase the safety of your vehicles.*

*V-9701 Bus Conspicuity Tape features superior nighttime reflectivity and daytime visibility. Superior reflectivity over long-distances provides motorists with the greatest amount of reaction time to make decisions and avoid accidents.*

*Utilizing prismatic reflective technology, V-9701 is effective in all types of weather conditions. Through rain, snow, or fog, V-9701 Conspicuity Tape effectively outlines the school bus in a bright yellow color keeping the bus visible to other motorists. Through application of V-9701, accidents are reduced, injuries avoided, and liability costs reduced.*

### **Long Life Reflector**

*With an all acrylic construction and pressure sensitive adhesive, V-9701 offers superior durability in the toughest weather conditions and climates for up to 7 years.*

### **Ordering Information**

*For availability and specifications contact Avery Dennison customer service at 1-800-327-5917 or contact your local Avery Dennison representative.*

## SPECIFICATIONS

**Materials** Microprismatic acrylic film

**Size** Primary widths are 1", 1.5", 1.75", 2", 9.75", and 12". Roll length is 150 feet. Special widths are available upon request.

### Federal Specifications

Meets or exceeds applicable requirements of the 1995 National Standards for School Buses, FMVSS 49CFR571.131 table 1 (ASTM D-4956 Type III and Type V sheeting).

Detailed specifications are available for review.

The permanent pressure sensitive adhesive will stand up to repeated washings and tough weather conditions.

All acrylic construction offers superior durability in the toughest weather conditions and climates for up to 7 years.

Metallized prismatic reflective technology provides superior nighttime reflectivity and daytime visibility.

Metallized construction is impervious to water and dirt penetration that can destroy reflectivity.
